

Dreams do
come True

COMPANY PROFILE

Our shipyard is located in Bodrum on the southwest of Turkey. Agantur was established 22 years ago with two naval architect and marine engineers, M. Sc. Today we are working with an automatic control and instrumentation engineer and an interior architect, M. Arts. In our closed area, we can build three 35m. yachts at the same time and also a yacht of 80m. of length can be constructed in. We specialize in steel and wood construction and traditional Turkish Gulets. Over 30 steel and wooden yachts have been designed, controlled and constructed in the last 20 years. 25 of our wooden and steel yachts had been exported to Italy, Greece, England, Gibraltar, Guernsey, Malta, Holland, France, Germany, Austria, Maldives and the USA.

As a building facility we have an enclosed yacht building area of 35meters in length, 21 meters in width in addition to a 35 m. by 9 m. area. We also have a timber drying kiln, sand blasting bench and air pressure system working tools. In 2003 invested in new covered shed of 45m. by 14m, for mega yacht construction.

Yacht design, material selection and construction supervision are carried out on a sub-constructing basis by our specialist team.
