Mooring And Dry Docking

Stay for a day, the season, or the rest of your life. Albatros Marina offers overnight, weekly, monthly, full season and annual dockage for its guests.

Mooring at Albatros

Discerning yacht owners appreciate the secure harbor location, full berth features and impeccably maintained facilities. All berths have access to electricity and water.

There are mooring facilities for various type sailing yachts and motor yachts in our boatyard. Although our winter mooring capacity is limited with 60 berths, the unique geographical location functions as well as a natural breakwater for those moored at our boat yard and therefore this number increases up to 150 yachts between May and October. The little river side quay that is also fitted with fresh water and shore power outlets, husbands some 60 yachts safely during the winter period.

Dry-docking at Albatros

Our yard is capable to host 240 yachts on the hard at the same time. We have got a travel lift of 20 tons for smaller yachts and a cradle for bigger ones. The cradle may pull out yachts those are up to 200 tons of weight and 30 meters of length. The travel lift and automatic crane offers to facilitate the manouvre of boats in and out of water efficiently. Since some draught depths of specially designed yachts may require a technical modification on the cradle, it is recommended to get a technically haulage confirmation prior to heading to the marina.

With electricity and water available throughout the dry-docking area, the boat owners can carry out their own shore repairs. There are also facilities for the laying-up of boats in a covered shelter.
