EXPERIENCED IN THE SECTOR

Desan Shipyard is one of the most experienced yards in Tuzla Bay for repairs, new buildings and conversions. The company started business in 1970 at the Golden Horn, Istanbul and in 1982 moved to Tuzla, Istanbul; the centre of the Turkish Shipbuilding Industry and attained worldwide success and fame with the vessels built and/or repaired. Desan was the first Shipyard to build an IMO II Chemical Tanker in Turkey in 1999, and soon after built many more for the European Owners. Desan is currently building high spec chemical tankers for Kaptanoglu account.

DESAN FAMILY

Desan's main power is its labour force. Each Desan employee is an expert in his/her field, very careful and serious at work. The employees of Desan are like a gigantic family clinched together. Individuals of Desan family are neither machines nor robots, but elite individuals with human values. They do not neglect their families and social lives as they are performing their duties successfully. Besides educational programmes designed to support the individual development of the personnel, Desan continuously organise entertainments and social activities for them.
