

## PRODUCTS:

- Submembranes • Air conditioning units • Trade fountains
- External units • Ventilation and Heating Exhaust Flues
- Porous tubular and planar films
- Full length of fibrous products
- Tanks for hot, heated, special purpose
- Bioreactor Systems

most models which are designed for separate  
treated materials for drinking water supply  
recycling, sewage and cold treatment  
and full or semi-continuous

and

## RECENT WORKS INCLUDE:

made by **Pollitec Polymer** extruding  
"pollitec membrane" by the use of ionizing  
polyethylene and polypropylene for the life time in  
Turkey. These films produced in this cooperation are  
extremely good in appearance and the  
strong features and for easily mounted or dismantled  
without any damage to your existing current pipes.  
It gives directly clear water to quality  
pollitec and a 10 year production  
experience.

The 1000 5000 m<sup>2</sup> membrane covering  
tanks will be finished in 2004.

## Pollitec

## BY POLLITEC GROUP

Pollitec and Membran have been  
jointly owned by members Pollitec and  
Membran since 1998. The group is now

the most powerful and flexible producer  
of extruded membrane covering

equipment with a wide portfolio for drinking  
water treatment, waste treatment and  
wastewater treatment. They also have international  
experience in the field of membrane

for treatment tanks. The membrane covering process
