GENERAL INTRODUCTION

YARDGEM Denizcilik A.Ş. was established in May 2004 through a joint-venture between YARDIMCI Shipping Group and GEMSAN, two of the oldest and well established maritime sector firms in Turkey.

Yardımcı Shipyard and Gemsan Shipyard have been serving Turkish and foreign shipping interests by providing ship building, ship repair, maintenance and overhauling services since 1975 and 1983 respectively.

Yardgem Denizcilik A.Ş., has been established by the cooperation of these two well-organized ship building and repair companies with almost three decades of experience and operational excellence with a truly professional approach, a quick turnaround, dynamic and reliable organization to ensure cost effective solutions to Turkish and foreign ship owners' needs.

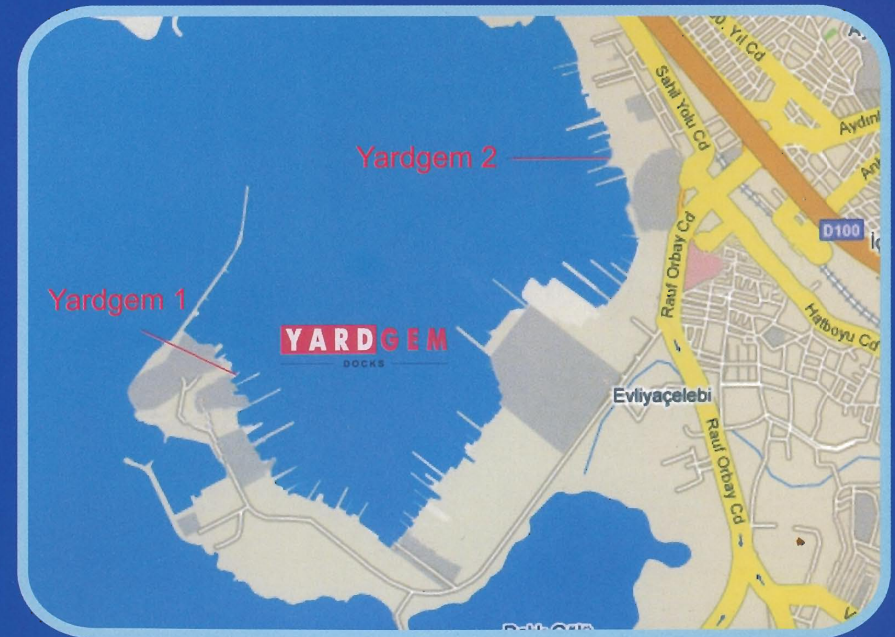

We are fully committed to providing the best possible ship repair services to our clients.

Having this purpose in mind; we have started our operations to offer optimum maintenance, drydocking, overhauling, steel and pipe renewal/installation, engine repair, blasting, painting, carpentry and upholstery, gas free, electric and electronic works and routine maintenance/overhauling works to our customers with the highest quality standards, reasonable pricing policy, reliable operation principles an experienced Professional staff truly committed to utmost customer care and satisfaction.

Istanbul

Yardgem Docks is deally located in Tuzla / Istanbul a well known shipbuilding and ship repair area for vessels trading or passing through Black Sea, Marmara Sea, Aegean Sea and Mediterranean waters.

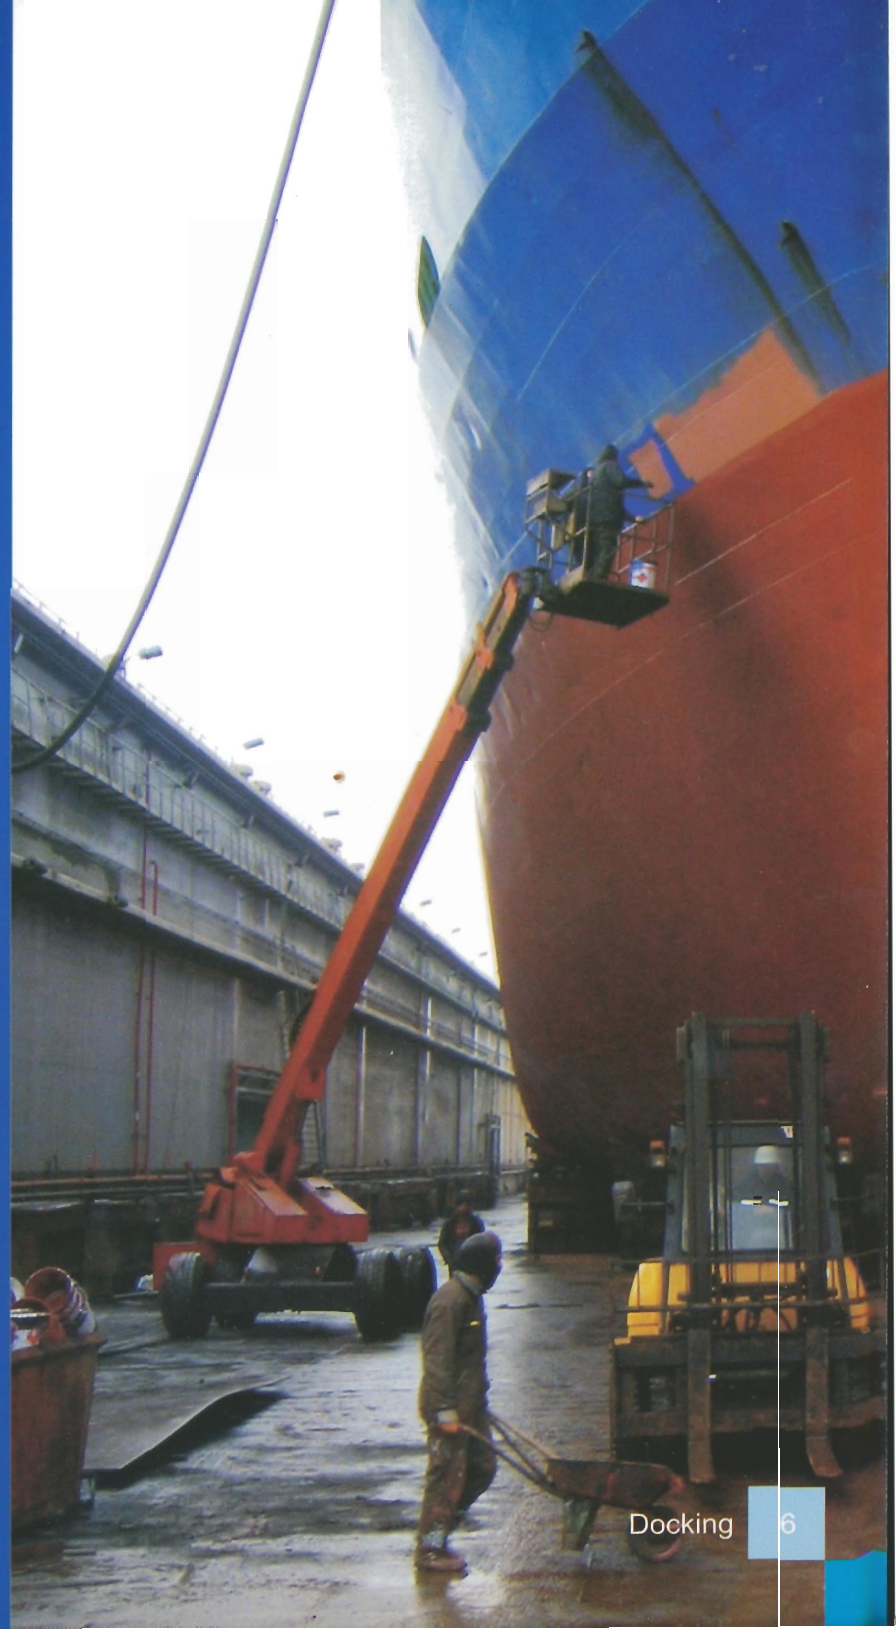

With two floating docks having a lifting capacity of 20.000 and 8.500 tons respectively, we are able to provide the fullest possible repair and special survey services for vessels in this range. We are also capable of providing repair and maintenance services for all types of ships up to tonnages of 80.000 Dwt. We are able to dock almost 90 ships a year in both floating docks.
